Parent Notification of Student Weight Status Reporting for 2008-2009 School Year

As part of a required school health examination, a student is weighed and his/her height is measured. These numbers are used to figure out the student's body mass index or 'BMI'. The BMI helps the doctor or nurse know if the student's weight is in a healthy range or is too high or too low. Recent changes to the New York State Education Law require that BMI and weight status group be included as part of the student's school health examination. For the 2008-2009 school year, a sample of school districts, including the Johnson City CSD, have been selected to take part in a survey by the New York State Department of Health. We will be required to report to the New York State Department of Health information about our students' weight status groups. Only summary information is sent. No names and no information about individual students are sent. However, you may choose to have your child's information excluded from this survey report.

The information sent to the New York State Department of Health will help health officials develop programs that make it easier for children to be healthier.

If you do **not** wish to have your child's weight status group information included as part of the Health Department's survey this year, please print and sign your name below and return this form to: **School nurse's office, by September 30, 2008.**

Please do not include my child's weight status information in the 2008-2009 School Survey.
